    <meta charset="UTF-8">
    <title>Emojis</title>
  </head>
  <body>
    <h1 style="font-weight:bold;text-align:center;color:blue;">Emojis are Characters from the UTF-8 character
set</h1>
    <p Style="font-weight:bold;color:yellow;font-size:20px">Emojis look like images, or icons, but they are not .
<br>They are letters from UTF-8(unicode) character set. UTF covers almost all charcters and symbols in world<br>
    To display HTML page correctly, a web browser must know character set used in the page ie. <meta>
tag</p>
    <h1 style="font-weight:bold;text-align:center;color:blue;">UTF-8 characters</h1>
    <p Style="font-weight:bold;color:yellow;font-size:20px">MAny utf-8 characters can't typed on a keyboard, but
they can always be displayed using numbers(entity numbers)<br>
    A is 65<br> B is 66<br> C is 67<br>
    <p>I will display A B C</p>
    <p>I will display &#65; &#66; &#67;</p>
    <h1>My First Emoji</h1>
    <p>&#128512;</p>
    <h1> sized Emojies</h1>
    <p style="font-size:50px;">&#128512; &#128516; &#128525; &#128151; <br>&#128513; &#128514;
&#128515; &#128517; &#128507; &#128508; &#128509; &#128510; &#128511; &#128128; &#128898;</p>
