    <title> Semantic </title>
  </head>
  <body>
    <h1>Semantic Elements are:</h1>
    <p style="font-size:20px;">article, aside, details,
    figcaption,figure,footer,header,main,mark,nav,section,summary,time</p>
    <section>
      <h1 style="font-size:20px;color:yellow;">Aboutsection</h1>
      <p1>Section element defines a section in a document</p1>
    </section>
    <section>
      <h1>WWF</h1>
      <p>WORLD WIDE FUND for nature is an international organization working on issuses of environment, formally
      named as WORLD WILDLIFE FUND founded in 1961</p>
    </section>
    <article>
      <h1 style="font-size:20px;color:yellow;">About article</h1>
      <p>article specifies independent, self-contained content, An article should make sense on its own, it should
      be possible to distribute it independently from the rest of web site</p>
    </article>
    <article>
      <h1>Google chrome</h1>
      <p>is a Web browser developed by Gooogle, released in 2008. world most popular web browser</p>
    </article>
    <p>we can't nested this above elements together by its defination</p>
    <h1 style="font-size:20px;color:yellow;"> header element</h1>
    <p>it represents a container for introductory content or set of navigatinol links</p>
    <p>it contains: one or more headings(h1-h6), logo or icon, authorship info</p>
    <p>we have many headers in one document but it never placed within footer,address or another header
    element</p>
    <article>
      <header>
        <h1>What Does WWF do?</h1>
        <p>WWf's misssion:</p>
      </header>
      <p>WWF's mission is to stop degradation of our planet's natural environment, and build future in which humans
      live in harmony with nature</p>
    </article>
    <h1 style="font-size:20px;color:yellow;">Footer element</h1>
    <p>It defines a footer for a document or section</p>
    <footer>
      <p>Author : suma</p>
      <p>
        <a href="mailto:lavanurusaisuma@gmail.com">lavanurusaisuma@gmail.com</a>
      </p>
    </footer>
  </body>
</html>

```

```
</footer>
<h1 style="font-size:20px;color:yellow;">nav element</h1>
<p> It defines a set of navigation links, only for major blocks of navigation links .not links present in nav</p>
<nav>
  <a href="/html/">HTML</a> |
  <a href="/css/">CSS</a> |
  <a href="/js/">JAVASCRIPT</a> |
  <a href="/jquery/">jQuery</a>
</nav>
<figure>
  
  <figcaption>Me 😊</figcaption>
</figure>
<h1 style="background-color:gray;">main Adv of semantic is A semantic web allows data to be shared and reused
across applications, enterprises,communities</h1>
</body>
