```html
<!DOCTYPE html>
<html>
 <head>
    <title>HTML Block-Inline Elements</title>
 </head>
 <body>
    <h1>BLOCK AND INLINE </h1>
    <p> Every HTML element has default display value : block & inline</p>
    <h1> BLOCK-LEVEL Elements</h1>
    <div style="background-color:black;color:white;padding:20px;">
    <p>Always start on a new line, and browsers automatically add some space before and after the element</p>
     </div>
    <p style="font-size:20px;"> Ex: div,p,address, aside
,canvas,div,dt,figcaption,footer,h1-h6,main,noscript,section,tfoot,video,article,blockquote,dd,dl,fieldset,figure,form,header,li,nav,ol,pre,table,ul</p>
    <h1>INLINE-LEVEL Elements</h1>
    <p> Doesn't start on a<span style="color:blue;background-color:yellow;font-weight:bold;"> newline only takes up</span> as much as width necessary</p>
    <p style="font-size:20px;">Ex: a,
acronym,bdo,br,cite,dfn,i,input,label,object,q,script,small,strong,sup,time,var,abbr,b,big,button,code,em,img,kbd,map,output,samp,select,span,sub,textarea, tt</p>
</body>
</html>
